Experience

Aviso AI

Aug 2024 – Present

Software Engineer

- Developed **UI Check Framework** to monitor **application health** and **performance** across **APIs** and **background jobs**.
- Implemented **real-time failure detection** and **latency monitoring**, improving **observability** and reducing **issue resolution time**.
- Automated **ticket creation** for **failed jobs** and **degraded APIs**, streamlining **incident management**.
- Automated **UI testing workflows** using **Python** and **Django**, reducing manual validation time from **2–3 hours** to **30–45 minutes** and significantly improving **testing efficiency**.
- Integrated **Jenkins** and **ClickHouse** with the **UI Check Framework** to monitor **jobs** and **database queries** automated **job failure detection** and **ticket triggering**, enabling **faster troubleshooting** and **proactive issue resolution**.
- Collaborated with **cross-functional teams** to **onboard clients** using a **configuration framework**, and managed job execution.

Metafic

Mar 2023 – Aug 2024

Software Engineer

- ETOH Suite App**: A platform featuring curated **E-commerce** and an **Employee Management System**. Solely integrated the third-party service **Brevo** for campaign scheduling; implemented **Deep Linking** to enhance user navigation and experience within the ETOH Suite App; and integrated Push Notifications using Firebase to improve user engagement and communication channels across the application ecosystem.
- SanatanDharma App**: A Hindu spirituality app featuring curated songs and articles. Solely implemented **notification systems** including Simple Notifications (API-based), **Email Notifications**, and **Push Notifications** using Firebase.
- Audio News App**: A **news application** delivering content in both **written** and **audio formats**. Implemented a **daily article consumption limit** feature, using **Celery** and **Redis** to manage and reset usage quotas efficiently.

Cogoport

Feb 2022 – Mar 2023

Associate Software Engineer

- Document Control**: Revamped and standardized **air logistics procedures**, improving **operational efficiency** and ensuring **seamless shipment delivery**, resulting in significantly higher **on-time delivery** rates and customer satisfaction. Managed **Shipment Bills** and **Delivery Order** workflows, enforcing **payment validation** prior to release to minimize **bad debt risk**.

Projects

Smart Pull Request Analyzer

Jan 2026

- Built an **AI-powered pull request review** automation using **Groq-hosted LLMs** to analyze code changes and suggest improvements.
- Designed **logic to detect PR events**, **extract diffs**, and **generate contextual code feedback** automatically.
- Reduced **manual code review** effort and improved **review consistency** through automated suggestions.

AI PDF Summarizer & Delivery System

Mar 2026

- Built an **AI-based** system using **LLMs**, **Django REST Framework**, and **Celery** to summarize user-uploaded PDFs.
- Processed documents **asynchronously**, generated summaries, converted them back to PDF, and **delivered via email**.

Skills

- Languages**: Python, Ruby, JavaScript, Data Sturcutera & Algorithms, DBMS
- Frameworks**: Django, Django Rest Framework, Ruby on Rails
- Tools**: Git, VS Code, Datadog, New Relic, Jupyter Notebook, Redis, Celery, LLM Integration (OpenAI API), Docker, Postman
- Platforms**: Postman, Jira, AWS, Linux

Education

National Institute of Technology

Aug 2018 – Jun 2022

B.Tech in Information Technology; CGPA: 7.10

Srinagar
